

Introducing Katzenpost, a modern mixnet

To do

- **Production vs. docker test mix network**

Currently our Epoch duration is hardcoded to 20 minutes. The docker test mix network uses an Epoch duration of 2 minutes and this setting is known as a "warped epoch". In the future we'll make the Epoch duration configuration via bash environmental variable, see github issue: <https://github.com/katzenpost/katzenpost/issues/744>
